

National Starch and Chemical

Indianapolis, IN
Two stories
17,614 square feet

Image, context and scale responsiveness were key concerns in designing a 2-story, office and high tech testing labs for a manufacturer. An atrium section with stairs and 2-entrance elevator creates a transition between the new and existing buildings on the site. Skylights enhance the office and lobby areas. Details of the new facade complement the original building. An upgrade to masonry wall construction provides durability and beauty.
